

Yassir Zahidi

Cybersecurity engineer-in-training · detection · controlled testing · hardening

yassirzahidi8@gmail.com · <https://y-zahidi.github.io> · github.com/y-zahidi · [linkedin.com/in/yassir-zahidi](https://www.linkedin.com/in/yassir-zahidi) · Morocco · remote / EU

Specialized Technician in Cybersecurity. I build reproducible SIEM labs (Wazuh · Suricata · Sysmon · MISP · FortiGate), exercise them in authorized scenarios, and turn observed gaps into stronger detection and hardening controls. Open to security engineering, detection, controlled testing, or hardening internships.

EXPERIENCE

Cybersecurity Intern · Authorized ministry-network environment

2024-05 — 2024-05 · Morocco

Designed and deployed a multi-layer SIEM on a real ministry network: Wazuh + Suricata + Sysmon + MISP + VirusTotal, integrated with the FortiGate perimeter and Nessus weekly vuln scans.

- Wrote custom Wazuh decoders + rules for FortiGate traffic and event logs (failed VPN, geo-anomaly, admin-out-of-hours).
- Pulled Sysmon channel via the Wazuh agent on Windows endpoints (process-create, network-connect, image-load).
- Mapped Suricata IDS alerts (EVE JSON) to MITRE ATT&CK techniques inside Wazuh.
- Wired MISP feeds (CIRCL, Abuse.ch) on a 6-hour sync; tagged alerts with matching threat-intel hits.
- Documented findings + remediation from the lab-segment penetration tests.

Engineering intern (digital twin) · ALTEN Maroc

2023-08 — 2023-09 · Morocco

Worked on the digital-twin pipeline for an industrial client.

SELECTED SECURITY CASE FILES

DECEPTR-UNIFIED · Unified cyberdeception, DFIR, threat-intelligence, and controlled-validation platform presented as a sanitized public case file with architecture and trust-boundary evidence.

Stack: Cyberdeception · DFIR · CTI · MITRE ATT&CK · Validation

home-lab-siem · Reproducible SIEM lab built around an authorized ministry-network deployment. docker compose up → Wazuh + Suricata + Sysmon + MISP online in ~3 minutes.

Stack: Wazuh · Suricata · Sysmon · MISP · FortiGate · Nessus · Docker

pentest-cheatsheet · Working notes on offensive security — recon → enum → AD → web → post-exploitation. The cheatsheet I actually use while studying.

Stack: Nmap · Burp · Metasploit · Bloodhound

ctf-writeups · Walkthroughs of the CTFs / boxes I solve — methodology over flags. TryHackMe + HackTheBox in a consistent template.

Stack: TryHackMe · HackTheBox · Markdown

CORE SKILLS

Detection engineering

Wazuh · Suricata · Sysmon · MITRE ATT&CK · Sigma · Atomic Red Team

Threat intel

MISP · VirusTotal · OpenCTI · CIRCL · abuse.ch

Perimeter / network

FortiGate · Nessus · VLAN · IPSec · CCNA-track

Controlled testing

Nmap · Burp Suite · Metasploit · Bloodhound · Mimikatz · CrackMapExec · Impacket · OSCP path

Validation loop

Atomic Red Team · Sigma · Caldera-style adversary emulation · Detection-as-code

OS / system

Linux (Debian / Ubuntu) · Windows Server · Active Directory

Dev

C / C++ (VCL) · PHP · HTML / CSS / JS · MySQL · Bash · Python (basics)

DevOps / data

Docker / Compose · Git / GitHub · QlikView · WordPress · VMware Workstation

EDUCATION

Engineer's degree (in progress)

Computer Engineering
École Marocaine des Sciences de l'Ingénieur (EMSI), Morocco
2024-09 — 2027-06

Specialized Technician diploma

Cybersecurity & Trust in Digital Environments
ISTA — Institut Spécialisé de Technologie Appliquée
2022-09 — 2024-06

CERTIFICATIONS

Fortinet NSE 1 · Fortinet NSE 2 · Fortinet NSE 3 · Certified Ethical Hacker (CEH essentials) · Network Defense Essentials · ICSI | CNSS — Cybersecurity Specialist · CCNA — Routing & Switching track · Google IT Support · Linux Essentials · Cybersecurity Bootcamp

LANGUAGES

Arabic (Native) · French (DELFI B2) · English (Professional)
